UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JUN 09 1981

Docket No. 50-548

Omaha Public Power District
ATTN: Mr. W. C. Jones
Division Manager -
Production Operations
1623 Harney Street
Omaha, Nebraska 68102

Gentlemen:

On November 13, 1980, Omaha Public Power District (OPPD) filed a request for withdrawal of application for Ft. Calhoun 2.

Under 10 CFR Part 170, it is Commission practice to recover review costs using the procedures of Footnote 3 to 10 CFR 170.21 when the review of the project is complete. The review of this project was completed as of December 22, 1980, the date the Atomic Safety and Licensing Board Panel dismissed the proceeding. Accordingly, we have determined the actual expenditures incurred for professional manpower and contractual support services from the date the application was filed to its date of withdrawal. Actual costs incurred were \$744,959. Under the Commission's regulations, we limit the charge for review to that which would be applied to the construction permit under 10 CFR 170.21 A.1, that is, \$744,959. \$125,000 has already been paid as an application fee. The balance due for the review of the construction permit application is as follows:

Unit 2 Actual Cost	\$744,959
Less Application Fee	<u>-125,000</u>
Balance Due NRC:	\$619,959

We have notified the NRC Office of Controller to issue an invoice to OPPD to cover the Commission's review costs.

Sincerely,

W. O. Miller
