Inspection Summary:

Special Inspection on March 2-5, 1981 (Report Number 50-334/81-06)

Areas Inspected: Review of actions taken as a result of commitments identified in a management meeting on July 18, 1980; documented in an IAL dated July 21, 1980; revised in Duquesne Light Company letters of October 30, 1980 and January 9, 1981 and restated in an NRC letter dated January 19, 1981 concerning installation of security equipment. The inspection involved 28 inspector-hours onsite by one NRC regional based inspector.

Results: The licensee was found to be in noncompliance with NRC requirements in one (1) of the areas examined, Testing and Maintenance (failure to have written procedures for operationally testing security equipment) (Details 3).
