Gentlemen:

Subject: Inspection Nos. 40-6377/81-02, 70-0622/81-01, 30-5215/81-01,
30-6983/81-01, 30-5216/81-01 and 30-12535/81-01

This refers to the routine safety inspection conducted by Mr. C. Rowe of this office on March 24-25, 1981 of activities authorized by NRC License Nos. SUB-348, SNM-561, 29-00047-02, 04, 06, and 08 and to the discussions of our findings held by Mr. C. Rowe with yourself and Messrs. Kerkowski and McCahill of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your licenses as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your licenses. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. These items of noncompliance have been categorized into the levels described in the Federal Register Notice (45 FR 66754) dated October 7, 1980. You are required to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

In addition, our inspector took smear samples at your firing range in Building 611-B which were analyzed in our Regional Office Laboratory in King of Prussia, Pennsylvania. The basic purpose of these independent measurements is to verify your capability for analyzing removable contamination. The results of our analysis were in agreement with your results.
