

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

JUN 6 1981

Docket Nos. 50-416  
and 50-417

APPLICANTS: Mississippi Power & Light Company  
Middle South Energy, Inc.  
South Mississippi Electric Power Association

FACILITY: Grand Gulf Nuclear Station, Units 1 and 2

SUBJECT: SUMMARY OF APRIL 15, 1981 MEETING

On April 15, 1981 members of the NRC staff met with the applicant, Mississippi Power & Light Company (MP&L), at the Grand Gulf site in Port Gibson, Mississippi to discuss the MP&L organizational structure for operations and general licensing matters. The staff also accomplished an aerial site overview to assess site surroundings and evacuation routes, and toured the Unit 1 containment, auxiliary building, and control room. The list of attendees is provided as Enclosure 1, and the agenda as Enclosure 2.

The meeting consisted of a discussion of the Grand Gulf licensing review schedule, with a focus on both the construction status and utility staffing to support start-up and operation. MP&L reiterated its commitment to meeting its projected fuel load date of December 31, 1981, and senior management attention to nuclear activities and staffing.

Based on a review of the Grand Gulf organization and construction status, the NRC indicated that it would continue to perform its OL review consistent with the applicant's construction and fuel load schedule.
