Docket Nos: 50-460  
50-513

May 22, 1981  
G01-81-154

Mr. R. H. Engelken, Director  
Nuclear Regulatory Commission  
Region V  
Suite 202 Walnut Creek Plaza  
1990 N. California Boulevard  
Walnut Creek, California 94596

Dear Mr. Engelken:

Subject: SUPPLY SYSTEM NUCLEAR PROJECTS NOS. 1/4  
IE BULLETIN 80-21, VALVE YOKES SUPPLIED  
BY MALCOLM FOUNDRY

Reference: G01-81-030, letter, DW Mazur to RH Engelken, same  
subject, February 3, 1981.

Per the reference letter the Supply System indicated that all vendors  
supplying safety related valves have been contacted, and all but  
Babcock & Wilcox indicated that none had used Malcolm Foundry as a  
supplier of cast valve parts. The Supply System was to respond by  
May 22, 1981 with the B&W results.

B&W which was unable to complete the review earlier has now responded  
and states that none of the valves supplied to the WNP-1/4 Projects  
have yoke castings or parts by Malcolm Foundry.

This completes the Supply System response to NRC IE Bulletin 80-21.

Very truly yours,

D. W. Mazur  
Program Director, WNP-1/4
