Walnut Creek, CA 94596

Sirs:

The long-range consequences appear awesome should the disposal standards for nuclear wastes be relaxed. However, added to that, your agency now proposes to allow the recycling of radio active metals from gaseous diffusion plants. These metals to be employed in the manufacture of toys and other items commonly found in the home. It is inconceivable to me that men and women of conscience could support such deregulations around nuclear materials. The future of this country and this planet depends on the people of today. I urge you to consider the impact of your decisions and help to insure our safer futures by not allowing these policies to take effect.

Sincerely,

Marilyn R. Palla
