The Honorable Alan Cranston
United States Senate
Washington, D.C. 20510

Dear Senator Cranston,

Thank goodness you are still in office - the ~~we were sure you would be~~

It has been called to my attention that the Nuclear Regulatory Commission is issuing a proposal to deregulate certain categories of nuclear waste from hospitals & laboratories to dispose of them in sewage systems & in landfills as well as radioactive scrap in the letter to be reused in making consumer products such as appliances toys, cooking utensils.

Since this violates the Atomic Energy Act & the requirements of the National Emission Policy Act. These new rules are far more lax than had us Congressional consultation, public hearings or Scientific panel hearings.

We trust that you are aware of these inexcusable actions & I'm sure are taking such necessary steps to stop such extremely dangerous & irresponsible conduct.

We're glad you are there to guide the people's interests & will certainly be behind you.
Sincerely, Elizabeth C. [illegible]
