Docket No. 50-336

Mr. W. G. Council, Vice President  
Nuclear Engineering & Operations  
Northeast Nuclear Energy Company  
P. O. Box 270  
Hartford, Connecticut 06101

Dear Mr. Council:

We have completed our physics review of the Basic Safety Report (BSR) submitted by your letter dated March 6, 1980. This BSR is intended to serve as a reference fuel assembly and safety analysis report for use of Westinghouse fuel assemblies in Millstone Nuclear Power Station, Unit No. 2.

Based on our review, we conclude that the physics portion of the BSR is acceptable for reference in licensing actions for Millstone, Unit No. 2. We expect to complete our review of the remaining sections of the BSR by September 1, 1981. We understand this is an acceptable schedule from your viewpoint.

A copy of our physics section safety evaluation is enclosed.

Sincerely,  
Original signed by  
Robert A. Clark
