

APPENDIX A

NOTICE OF VIOLATION

Norwich University
Northfield, Vermont 05663

Docket No: 30-01092
License No: 44-07570-01

As a result of the inspection conducted on March 27, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified:

- A. 10 CFR 20.201(b) requires that you make such surveys as may be necessary for you to comply with all sections of Part 20. As defined in 10 CFR 20.201(a), "survey" means an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of conditions.

Contrary to this requirement, as of the day of the inspection, March 27, 1981, you failed to make such surveys as were necessary to assure compliance with that part of 10 CFR 20.101 that limits the radiation exposure to the extremities of individuals. Specifically, you failed to evaluate the radiation dose to the hands and fingers of personnel who used phosphorus-32 from March 1979 to August 1980.

This is a Severity Level IV Violation. (Supplement IV)

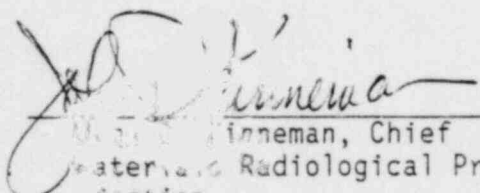

- B. Condition 12 of your license limits the use, or supervision of use, of licensed material to certain named individuals.

Contrary to this requirement, from March 1979 to August 1980 an individual not authorized by this license condition routinely used licensed material at your institution and you failed to amend your license to reflect this use.

This is a Severity Level IV Violation. (Supplement VII)

Pursuant to the provisions of 10 CFR 2.201, Norwich University is hereby required to submit to this office within twenty-five days of the date of this Notice, a written statement or explanation in reply, including: (1) the corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.

Dated 28 APR 1981

William J. Finneman, Chief
Materials Radiological Protection
