

May 27, 1981

Dear Mr. Hendrie,

- 2 (711)

(46 FR 17216)

We need to develop our own Nuclear Power Plants as quickly as possible to lower our dependence on Foreign energy sources.

Licensing of existing Nuclear Plants is a good way to get started.

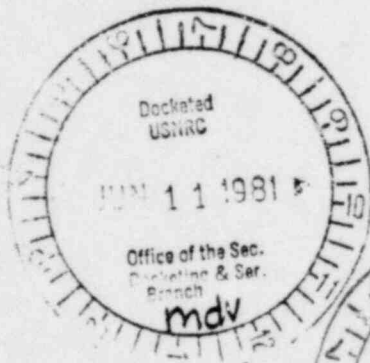

Development of Nuclear Power would make other fossil fuels available for transportation to which nuclear is not readily adaptable.

Even with the Three Mile Island "accident" Nuclear Power is the safest power available.

Thank you for doing whatever you can to help speed up the licensing process.

Sincerely

Walter H. Kendall
