Operating License No. DPR-72
Organizational Changes

Dear Sir:

This is provided to formally notify your office of organizational changes which have been informally described to members of your staff. A revised Technical Specification Change Request will also be provided in the near future.

The Off-Site Organization described in Change Request No. 55, Revision 2, has been modified as follows:

- a) The Nuclear Operations Training Manager now reports to the Manager, Nuclear Support Services.
- b) The Nuclear Operations Administrative Manager now reports to Nuclear Operations Controls.

The On-Site Organization described in Change Request No. 51, Revision 2, has been modified by identifying a second Technical Support Services Superintendent, reporting to the Nuclear Plant Manager, responsible for Security.

The Off-Site changes were made to reduce the number of persons reporting to the Assistant Vice President, Nuclear Operations, thereby allowing him to be more effective in managing Florida Power Corporation's nuclear program. The On-Site change was made to increase the attention being given to Security by FPC/CR3 management.

Additionally, beginning July 6, 1981, Mr. W. A. Cross will be assuming the role of Manager, Nuclear Licensing. All future correspondence with the Nuclear Regulatory Commission will be over Mr. Cross', Dr. P. Y. Baynard's (Manager, Nuclear Support Services), or my signature.

Florida Power Corporation anticipates these changes having a positive impact on FPC operations.

Very truly yours,

A handwritten signature in dark ink, appearing to read "John A. Hancock", with a long horizontal flourish extending to the right.

John A. Hancock
Assistant Vice President
Nuclear Operations
