Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20553

Attention: Ms. E. G. Adensam, Acting Chief  
Licensing Branch No. 4

Subject: McGuire Nuclear Station  
Docket Nos. 50-369 and 50-370

Dear Mr. Denton:

The Interim Data Report for the EPRI PWR Safety and Relief Valve Test Program was transmitted to the Nuclear Regulatory Commission via Mr. R. C. Youngdahl's letter of July 1, 1981. This report summarizes the test data collected to date on safety and relief valves. The McGuire safety and relief valves are being tested in the EPRI program. Duke Power Company will submit test evaluations and other plant specific data on a schedule consistent with Mr. Youngdahl's letter of December 15, 1980 as modified by his letter of July 1, 1981.

Mr. Youngdahl's July 1, 1981 letter also discussed a proposed EPRI program for testing block valves. Duke Power Company is involved in the development of this program which will be discussed with the Nuclear Regulatory Commission in mid July, 1981.

Very truly yours,

A handwritten signature in cursive script that reads "William O. Parker, Jr.".
