Mr. D. J. Sreniawski, Chief
Materials Radiation Protection
Section 2
United States Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

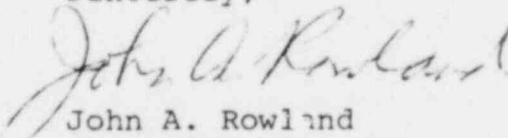

RE: License No. 34-01334-02

Dear Mr. Sreniawski:

Enclosed please find a written statement in reply to our areas of noncompliance identified during our routine safety inspection of May 1, 1981. We have applied corrective action with relation to daily surveys and maintaining records of these surveys.

Again, thank you for your assistance.

Sincerely,

John A. Rowland
Executive Director

Re: Response to safety inspection by the N.R.C.

As of May 1, 1981 daily surveys of preparation and injection areas are being done. These surveys are performed by the nuclear medicine technician.

Weekly surveys were not recorded between April 15, 1979 and June 20, 1980. The individual responsible for maintaining those records has been terminated. Since June 20, 1980 when we hired a new nuclear technician, records have been maintained.

I will spot check to see if the daily surveys are being done and check records periodically to see that they are being kept. Nuclear Medicine Associates will also check to see if the daily surveys are being done and records of weekly surveys are performed.

TH/je

I attest that the above information from Tom Husted, Administrative Technologist - Radiology, is true and accurate.

John A. Rowland, Executive Director
