Docket No. 50-293

Ref: BECo. Ltr. 80-310 dated December 15, 1980. Item 1.C.1.
"Guidance for the Evaluation and Development of Procedures for Transients and Accidents".

Dear Sir,

In the referenced letter Boston Edison Co. (BECo) committed to revising and implementing the emergency procedures for Pilgrim Nuclear Power Station (PNPS) at the first refueling outage after January 1, 1982 in accordance with NRC staff approved emergency procedure guidelines.

PNPS's next refueling outage is scheduled to commence in September 1981 and conclude in December 1981. There is however, a possibility that this outage may extend into 1982. To preclude any confusion regarding the above commitment, should the outage completion be extended, BECo herein clarifies that position.

BECo shall revise and implement the emergency procedures for PNPS, in accordance with the staff approved guidance, at the first refueling outage scheduled to commence after January 1, 1982.

We believe this commitment satisfies the intent of Item 1.C.1. should you have any questions or require any additional information, please do not hesitate to contact us.

Very Truly yours,

Harrison R. Balfour for
A. V. Morisi
