Docket Nos. 50-266
and 50-301

Mr. Sol Burstein
 Executive Vice President
 Wisconsin Electric Power Company
 231 West Michigan Street
 Milwaukee, Wisconsin 53201

Dear Mr. Burstein:

Your letter of December 23, 1980 provided your initial response to NUREG-0737, Clarification of TMI Action Plan Requirements. In that letter you provided information relating to TMI Action Plan Item II.E.4.2.5, Containment Pressure setpoint. During a telephone conference call with members of your staff on April 14, 1981 we requested additional information on this subject which you provided in your letter dated May 7, 1981. We have completed our review of your responses. A detailed analysis is contained in the attached Safety Analysis Report (SER). Based on our review, the staff concludes that the containment pressure isolation setpoint for Point Beach Nuclear Plant Units 1 and 2 meets the requirements of NUREG-0737 and additional staff guidance as contained herein and is, therefore, acceptable. This completes our review of TMI Action Plan Item II.E.2.4.5 for your facilities.

Sincerely,

Original signed by
Robert A. Clark

Robert A. Clark, Chief
 Operating Reactors Branch #3
 Division of Licensing
