(Docket No. PRM-30-58)

DOCKET NUMBER ^①
PETITION RULE PRM -30-58
(46 FR 35662)

Gentlemen:

This comment is in reference to the petition for rule making from the National Bureau of Standards published 7/10/81 in 46FR35662.

The petition addresses a practical problem with respect to the acquisition of environmental standards. Alternative 1 presents a preferred straightforward and simple solution to the problem providing the appropriate qualifying language can be devised.

I endorse prompt action on this petition by the Commission.

Sincerely,

Robert M. Quillin, CHP
Radiological Health Program Director
