Docket: 50-382/89-27

Louisiana Power & Light Company
ATTN: J. G. Dewease, Senior Vice President
Nuclear Operations
317 Baronne Street
New Orleans, Louisiana 70160

Gentlemen:

This refers to the inspection conducted by Mr. R. E. Baer of this office during the period October 16-20, 1989, of activities authorized by NRC Operating License NPF-38 for Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. J. R. McGaha and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included occupational radiation protection and transportation activities during the recent refueling outage. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed inspection report.

During the inspection, it was found that certain of your activities were in violation of NRC requirements. However, in accordance with 10 CFR Part 2, Appendix C, Section V.G.1 of the NRC's Enforcement Policy, no citation is being issued for the violation described in paragraph 10 of the enclosed inspection report.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

151

Samuel J. Collins, Director
Division of Reactor Projects
