Re: Docket No. 50-77, Facility License R-31
AGN-201 Research and Test Reactor, Serial No. 101
Reactor Security Plan Amendment

The Reactor Security Plan, Rev. December 1989, is submitted herewith.

The revisions incorporate material previously submitted, reflect the previously approved change in the status of the license to "possession only", and amend the submittal of 27 July 1988 which requested approval for a reduction in the reactor facility boundary. Incorporation of the revisions should result in a current stand-alone security plan which requires no reference to prior correspondence.

The University Radiation Safety Committee has previously found that these changes do not decrease the security of the facility.

The security plan is claimed to be exempt from public disclosure in accordance with applicable regulations.

Warren E. Keene,
Reactor Administrator
