

DEC 15 1989

Docket No. 50-219

GPU Nuclear Corporation
ATTN: Mr. Eugene E. Fitzpatrick
Vice President and Director
Oyster Creek Nuclear Generating Station
P. O. Box 388
Forked River, New Jersey 08731

Gentlemen:

Subject: Inspection Report No. 50-219/89-26

A routine safety inspection was conducted on October 30 - November 3 and November 13-16, 1989 by S. Sherbini at the Oyster Creek Station. The purpose of the inspection was to review the status of items identified for followup during previous NRC inspections.

Within the scope of this inspection, no violations were identified. All items reviewed except for two items were closed based on corrective actions taken by your staff. The first item remaining open addresses corrective actions in connection with potential pathways for unmonitored releases that were found to exist at Oyster Creek. The second item is an unresolved issue that addresses the applicability of personnel qualification requirements described in the Technical Specifications.

In closing the above items, issues were identified that appear to have been contributing factors in several of the incidents. They are discussed in detail in the attached inspection report. Most of these issues were also identified as requiring improvement by the Radiological Controls Task Force and are included as action items in your Plan for Excellence at Oyster Creek.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
Ronald R. Bellamy
