> South Texas Project Electric Generating Station Units 1 and 2 Docket Nos. STN 50-498, STN 50-499 <u>Control Room Design Review Status</u>

Reference: A. Control Room Design Review Status; M. A. McBurnett, HL&P, Letter to the NRC; ST-HL-AE-2793; dated October 18, 1988.

> B. Reforecast of Category C Human Engineering Deficiencies (HEDs) Originally Scheduled for Unit 1 Refueling; M. A. McBurnett, HL&P, Letter to the NRC; ST-HL-AE-3074; dated May 11, 1989.

Enclosed are updates to the Control Room Design Review (CRDR) reports for the South Texas Project Electric Generating Station (STPEGS) as follows:

- Executive Summary Addendum 5
- Human Engineering Discrepancy Resolution Report Addendum 4
- Program Plan Addendum 1

These reports reflect the status of the STPEGS CRDR program as of December 1, 1989. Revision bars are used in the HED Resolution Report Addendum to denote changes from the previous submittal (Reference A), where applicable. For Human Engineering Discrepancies (HEDs) which have been resolved, a specific completion statement is included for each Unit, as appropriate. Where no completion statement is included, corrective action for that HED is still in process. Since the Executive Summary and Program Plan Addenda consist of new material, no revision bars are used. Refer to Attachment 2, Section 5.0 (Executive Summary - Addendum 5) for the current implementation schedule.

Most of the HEDs concerning the Qualified Display Processing System (QDPS) have been corrected through firmware modifications prepared by Westinghouse. These modifications were implemented during the first refueling outage for Unit 1 and prior to Commercial Operation for Unit 2. Implementation of the remaining minor graphics changes remains scheduled for the third refueling outage for each Unit (Reference A). QDPS items are discussed further in Attachment 3 (HED Resolution Report - Addendum 4, Note CPT-1, Page 2-3).

HL&P remains committed to the Control Room Design Review Program as an ongoing program. The CRDR Program Plan describes the process used during the STP construction phase. Addendum 1 to the Program Plan has been prepared to address CRDR activities, now that both Units are operational, and is included as Attachment 4.

Attachment 1 contains a current list of CRDR reports for your information. If you should have any questions on this matter, please contact Mr. A. W. Harrison at (512) 972-7298.
