Docket No. 50-254
Docket No. 50-265

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Senior Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This confirms our plans as discussed between Ms. Rita Stols of your staff and Mr. Don Jones of this office to meet with Mr. D. Galle and other members of your staff at the NRC Regional Office in Glen Ellyn, Illinois, on January 11, 1990, at 9:00 a.m.

This meeting is being held to discuss your plans to improve the quality of work activities at the Quad Cities Station to prevent recurrence of challenges to the plant similar to the unanticipated turbine scram and subsequent reactor feedwater transient that occurred with Unit 1 on December 14, 1989. Your decision to not scram the unit during the event should also be discussed. While the decision was appropriate for the circumstances, we are concerned that it will provide the wrong message to your staff with regards to following procedure requirements. Please be prepared to discuss this concern and your corrective actions. Finally, we would like for you to discuss your procedure upgrade plans, including the establishment of priorities with appropriate milestones.

We appreciate your cooperation in this matter, and will gladly discuss any questions you may have concerning this meeting.

Sincerely,

Original signed by E. G. Greenman
