ATTN: Maj. Mark Pierson
Director of Logistics
U. S. Army Jefferson Proving Grounds
Madison, IN 47250

License No. 13-12416-01

Gentlemen:

During the routine safety inspection conducted by Mr. K. J. Lambert and myself on November 29, 1989, of activities authorized by License No. 13-12416-01, it was brought to our attention by Mr. Tom Roller that radioactive material authorized by the aforementioned license is not currently possessed, nor has any radioactive material been possessed for approximately ten years. Furthermore, Mr. Roller stated there are no plans to procure radioactive material under this license in the near future. Due to this information the inspection was concluded.

It also has come to our attention that Mr. Richard H. Herring, the Radiation Protection Officer, is no longer employed at the facility. Please be advised that prior to procuring radioactive material under this license an amendment authorizing a new Radiation Protection Officer must be approved by this office.

We will gladly discuss any questions you may have.

Sincerely,

D. J. Sreniawski, Chief
Nuclear Materials Safety
