(c) Teleconference between Mr. G. L. Bell (BG&E) and Mr. J. E. Beall
(NRC) on January 2, 1990, Corrective Action Extension

Gentlemen:

In response to a Notice of Violation issued June 16, 1989 (Reference a), BG&E agreed to take several corrective actions with respect to our Motor Operated Valve (MOV) maintenance program. As part of the corrective actions, we agreed to revise our preventive maintenance procedures for Bulletin 85-03 MOVs by December 31, 1989 (Reference b). We did not meet this schedule because the MOV Project Manager did not effectively resolve impediments to the procedure revisions.

Both Units have remained shutdown since the MOV inspection and have not entered into a mode where the identified MOVs are required to be OPERABLE. Also, preventive maintenance (PM) for these valves is not scheduled until the end of January. We will complete the maintenance procedure revisions by January 15, 1990. In addition, we will not perform any Bulletin MOV PM until the procedures are revised.

We informed Mr. J. E. Beall, our acting Senior Resident Inspector, January 2, 1990, that we would not meet our schedule for this corrective action (Reference c).
