

DEC 29 1989

Docket No. 50-333

Power Authority of the State of New York  
James A. FitzPatrick Nuclear Power Plant  
ATTN: W. Fernandez  
Resident Manager  
P. O. Box 41  
Lycoming, New York 13093

Gentlemen:

Subject: NRC Inspection Report No. 50-333/89-21

A routine unannounced radiological controls inspection was conducted at the James A. FitzPatrick Nuclear Power Plant on November 27 to December 1, 1989. Areas reviewed during the inspection included licensee actions on previously identified items, audits and appraisals, external exposure control, control of radioactive material, and your as low as reasonably achievable program. Your corrective actions regarding the unplanned personnel exposure during Spent Fuel Pool work on June 12, 1989 were reviewed and are satisfactorily completed, therefore that open item will be closed. The results of this inspection are described in the enclosed report.

Within the scope of this inspection, two violations and one unresolved item were identified. The apparent violations are in the areas of adequacy of radiological surveys and procedure adherence. The unresolved item relates to apparent problems in performing required corporate and site audits of the radiation protection program. The violations are described in the enclosed Appendix A, Notice of Violation. You are required to respond to this Notice of Violation and follow the instructions specified in Appendix A. We also request that with your response to the apparent violations you provide your response to the unresolved item described in the enclosed report.

Your cooperation with us is appreciated.

Sincerely,

*Ronald R. Bellamy*  
Ronald R. Bellamy, Chief  
Facilities Radiological Safety  
and Safeguards Branch  
Division of Radiation Safety  
and Safeguards
