Dear Mr. Creel:

SUBJECT: WITHDRAWAL OF AMENDMENT REQUEST REGARDING A ONE-TIME EXTENSION OF  
THE CONTAINMENT INTEGRATED LEAK RATE TEST INTERVAL (TAC 75223)

Your application of October 27, 1989, as supplemented on December 8 and 20, 1989, requested a one-time extension to the Technical Specification (TS) interval 4.6.1.2a for performing a containment integrated leak rate test (CILRT) at Calvert Cliffs Unit 2. This extension was requested until August 1, 1990 or entry into Mode 4 (reactor coolant system (RCS) temperature greater than 200 degrees F but less than 300 degrees F).

Currently, Unit 2 is defueled. As the TS 3/4.6.1, "Primary Containment," requirements including TS 4.6.1.2a are only applicable to operation in Modes 1 through 4, the requirement to perform a CILRT must only be completed prior to heatup to Mode 4 as long as the unit is maintained in compliance with the CILRT scheduler requirements contained in Section 111.D.1.(a) of 10 CFR Part 50, Appendix J. Consequently, this amendment of TS 4.6.1.2a is not needed due to current plant conditions.

This determination was discussed with your licensing staff on December 21, 1989, whereupon they agreed to the withdrawal of this amendment request.

This letter constitutes notice that the October 27, 1989 TS amendment request has been withdrawn from further NRC staff consideration.

Sincerely,

*Scott Alexander McNeil*

Scott Alexander McNeil, Project Manager  
Project Directorate I-1  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation
