RE: License #37-10509-01

Dear Ms. Joustra:

We are sending a copy of the proposed temporary operating area for our RIA operations only.

The scanning area will be mothballed. All sources and calibrators will be stored in a suitable area of Room #120 in Building 11. All generators will be secured and returned to Mallinckrodt, St. Louis, MO. All monitoring of RIA laboratory will remain the same. Radiation protection measures and bio-hazard measures will remain the same, as will receipt and disposal procedures.

Hopefully, this move will be over 3 weeks following our move to Bldg. 11 and we will return to Bldg. 59.

The formal request follows via V. A. Central Office.

If there are any questions, please contact us at 215-383-0291 or FAX #489-7207 or 215-383-0207.
