Dear Mr. Miltenberger:

SUBJECT: SIMULATOR CERTIFICATION FOR 10 CFR 55.45(b)(2)  
(TAC NO. 72192)

RE: HOPE CREEK GENERATING STATION

We have completed our review of your submittal dated December 7, 1988, wherein you submitted NRC Form 474, "Simulation Facility Certification," for the Hope Creek Generating Station in compliance with 10 CFR 55.45(b)(2). The staff finds the documentation to be complete and requires no further information on your part at this time. Our review was only to ensure completeness of your documentation, and did not extend to verification of the accuracy of the data or statements made in the certification, nor does our review provide NRC approval of the acceptability of a particular simulator for use in administering operating tests. In addition, NRC approval is neither granted nor required in the case of such certification because Public Service Electric and Gas Company has the responsibility for regulatory compliance with respect to your plant-referenced simulator.

Sincerely,

Clyde Shiraki, Project Manager  
Project Directorate I-2  
Division of Reactor Projects I/II  
Office of Nuclear Reactor Regulation
