Docket No. 030-30356
Control No. 108170

Gentlemen:

SUBJECT: APPLICATION FOR MATERIAL LICENSE

This concerns your application for a material license, dated December 23, 1987; our letter dated March 22, 1988, in which we notified you that the application was deficient and that certain additional information was required; and our letter dated June 24, 1988, in which we notified you that unless the additional information was submitted, we would consider your application as having been abandoned by you.

Soon following our June 24, 1988 letter, we were contacted by a representative of Toshiba U.S.A. who informed us that they were assisting your company in providing the necessary information and requested additional time to respond. In our telephone conversation, the Toshiba representative implied that the supporting information would be submitted within a short time frame.

As of the date of this letter, this additional information still had not been received. Therefore, we consider your application as having been abandoned by you and have voided the active control for your request. This action is without prejudice to the resubmission of an application. Note that should you decide to resubmit your application within one year of the date of this notice, with the necessary additional information, an additional fee will not be required.

Sincerely,

J. Bruce Carrico

MAR 22 1988

Angelo Brothers Company
ATTN: Louis Kuchler
Vice President
10981 Decatur Road
Philadelphia, PA 19154

Gentlemen:

This refers to your application dated December 23, 1987, for a license to distribute, pursuant to Section 32.14 of 10 CFR Part 32, electron tubes in compact fluorescent lamps containing radioactive material to persons exempt from licensing pursuant to Section 30.15 of 10 CFR Part 30. We find that the following additional information is needed in support of your license request:

1. You should provide a sketch or otherwise describe the area at your facility where the lamps will be stored prior to distribution. You should also describe your procedures for assuring that the lamps will be secure from unauthorized removal while in storage.
2. Your NRC license will identify all locations from which you are authorized to distribute the products in the United States. Please confirm that you only intend to distribute the devices from the Philadelphia location.
3. Concerning disposal of the lamps by Angelo Brothers, you simply state on page 5 of the Appendix, "All waste disposal will meet or exceed NRC and applicable state regulations." To the extent that Angelo Brothers possesses the lamps, disposal must be carried out in accordance with the requirements specified in 10 CFR Part 20. In general there are two options; transfer to a licensed radioactive waste disposal firm or return to the manufacturer for disposal. Please specify how you intend to dispose of waste materials. If you intend to transfer the materials to a licensed disposal firm, you must identify the name and license number of the firm.
4. On page 7 of the appendix, in items F and G, you discuss procedures for quality control testing of the electron tubes by both Toshiba and Nemoto. In both of these items you indicate that only a random sample will be subjected to certain tests. You should note that paragraph 32.15(a)(2) requires that the sample size and testing must be in accordance with the tables and instructions specified in Section 32.110 of 10 CFR Part 32, unless otherwise authorized pursuant to paragraph 32.15(b). It is not apparent from the information you provided that the quality control testing procedures are in accordance with these requirements. Please clarify and/or describe procedures to show the tests will meet the requirements.

Mr. Louis Kuchler

- 2 -

- 5. The information you provided concerning labeling indicates that the lamp package rather than the electron tube will be labeled. The exemption provided in paragraph 30.15(a)(8) is for electron tubes. Paragraph 32.15(d) specifies that each unit (e.g., the electron tube) must be labeled. Paragraph 32.14(b)(E) provides that the applicant must submit information on its proposed method of labeling both the unit and its container. While we would consider alternative labeling provisions, such alternatives must be justified and shown to be equivalent to labeling the tube or product itself. You should also provide information to show that the label can be expected to remain durable and legible over the expected useful life of the product and provide a sketch or drawing to show the location of the label on the unit and package.
- 6. You should also note the reporting requirements specified in Section 32.16 of 10 CFR Part 32 and confirm that you understand and agree to abide by these requirements.

Our review of your application will continue upon receipt of the above information. Please reply within 30 days, in duplicate, and reference Mail Control No. 108170. If you have questions, please feel free to call me at (301) 492-0634.

Sincerely,

JBC
