Date Completed	10/11/88
By:	J. H. Hensley

Dear Dr. Glenn:

Please be advised that we wish to amend the subject license with respect to the physical size and configuration of the storage area being used to hold licensed by-product material for disposal by decay. The existing storage area is located where we would like to construct a new waste management building. This building will be used for volume reduction and other processing of radioactive wastes as well as processing of other non-radioactive wastes. Details on this new facility will be submitted as a separate amendment at a later date.

Permission is hereby requested to move the existing decay storage to a new location to make room for construction of the new building. All aspects of security and physical design previously approved (Amendment 7), except for size and location, will remain the same.

A sketch showing the location and size of the new storage area is attached as is a check for \$120.00 to cover the amendment application fee.

Yours truly,

George W. Moncrief
