SUBJECT: Revision of NUHOMS Topical Reports

REFERENCE: NRC Letter of 11-8-89 from Anthony T. Gody to R. Howard Smith, Subject: Reorganization for NUHOMS

Dear Sirs:

The purpose of this letter is to respond to the NRC's request to establish a schedule for the revision of the NUHOMS Topical Reports. The request was contained in the referenced letter.

We have reviewed both topical reports and concur that Chapters 11 will need to be modified. Accordingly, we have established February 28, 1990 as the date for completion of this revision.

We intend to accomplish this revision by issuance of an amendment to the existing topical reports. Only the affected pages will be reissued. We will control the distribution of this amendment so that all currently controlled NUHOMS Topical Reports will be updated. We will require formal indication of receipt of the amendment from the topical report holder.

Additionally, as a follow up to our letter of September 13, 1989, the current revision status of our QA program is as follows. Our QA Manual will be revised and reissued by late January, 1990. We have decided to implement a consolidated set of implementing QA procedures for the entire corporation. This undertaking will require more effort than we had originally scheduled. We now believe that all applicable procedures will be reissued by June, 1990. As we have previously stated, all existing procedures will remain in effect until we reissue the consolidated ones.

We trust that the above meets with your approval. Please contact the undersigned at (206) 874-2235 if you have any questions or comments concerning this letter.

Sincerely,

PACIFIC NUCLEAR SYSTEMS, INC.
