Gentlemen:

Enclosed for your information are the survey results from the November 17, 1989, confirmatory survey conducted by Mr. J. Roth of our Region I office. Both Grid B-138 and the outfall now meet the guideline levels; no further soil removal is required. As soon as we receive a completed Form NRC-314 (enclosure 2) certifying that all uranium from the site has been removed, we can complete actions necessary to terminate License No. SNM-777. This action should be taken within the next 30 days. If there are any delays in submitting Form NRC-314, contact Ms. Merri Horn at 301-492-0606.

Sincerely,

Original Signed By:

Glen L. Sjoblom, Acting Chief
Fuel Cycle Safety Branch
Division of Industrial and
Medical Nuclear Safety, NMSS
