Docket No. 50-368  
License No. NPF-6  
Second 10-Year Inservice  
Testing Program Submittal

Gentlemen:

The ANO-2 Inservice Testing Program for pump and valve testing for ASME Boiler and Pressure Vessel Code, Section XI, IWP and IWV, is enclosed. The interval begins March 26, 1990. Per the requirements of 10CFR50.55a(g)(4)(ii), the program for the second 120-month inspection interval is in compliance with the 1986 Edition of the ASME Code.

The program and relief requests were developed utilizing the 1986 Edition of Section XI and NRC Generic Letter 89-04, "Guidance on Developing Acceptable Inservice Testing Programs." ANO has recently received a Supplemental Safety Evaluation (SSE) for the first 120-month inspection interval transmitted in NRC letter of November 15, 1989 (2CNA1189Ø2). We are currently reviewing the SSE to determine if any modifications to our Second 10-Year IST Program will be necessary based on the SSE. Any such modifications will be made as necessary prior to March 26, 1990.

The program will be maintained at ANO for NRC inspection. Program updates/revisions will be modified using the guidance in Generic Letter 89-04, Part D.

Chet-

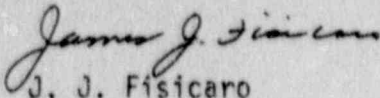

As we discussed last week  
on the phone, this is the AWO-2  
2<sup>nd</sup> 10-YR IST Submittal for  
you to get docketed, since in  
the past drawings & attachments have  
separated from the letter when received  
there. If you have any questions please let  
me know.

Thank you,  
Dale Phillips
