Docket No. 50-373
Docket No. 50-374

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Senior Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This refers to the routine safety inspection conducted by R. Lanksbury and R. Kopriva of this office on October 24 through December 7, 1989, of activities at LaSalle County Station, Units 1 and 2, authorized by Operating Licenses No. NPF-11 and No. NPF-18 and to the discussion of our findings with Mr. G. Diederich at the conclusion of the inspection.

The enclosed copy of our inspection report identified areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as described in the enclosed Notice. A written response is required. We identified one violation which consisted of six recent examples where employees have failed to adhere to procedures. These examples originate from various organizations on-site demonstrating a widespread failure to meet this regulatory requirement. Consequently, your response should address this issue on a programmatic basis. Should such violations continue to occur, the NRC may consider additional actions.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC's Public Document Room.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
