TECHNICAL SERVICES

Mr. R. C. Jones, Chief
Reactor Systems Branch
Division of Engineering and System Technology
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Jones:

Subject: Responses to NRC Questions on ANF-88-133(P)

- References:
1. Letter, R. A. Copeland (ANF) to Director NRR (USNRC), "Submittal of ANF-88-133(P)," September 7, 1988. RAC:056:88.
 2. Letter, M. W. Hodges (USNRC) to R. A. Copeland (ANF), "Request for Additional Information on ANF-88-133(P) and ANF-81-51(P), Rev. 2, Supplement 3," June 2, 1989.
 3. Letter, R. A. Copeland (ANF) to M. W. Hodges (USNRC), "Responses to NRC Request for Additional Information in Review of ANF-88-133(P)," August 25, 1989.

As part of the review of ANF-88-133(P), an extension of the ANF PWR high burnup methodology, the reviewer requested additional information (Reference 2) that was supplied by the Reference 3 letter. Subsequently, the reviewer asked for additional information on two of these responses. This letter is transmitting that supplemental information. Please consider the information in this supplemental information to be proprietary to ANF. The affidavit supplied with the Reference 1 letter provides the information specified by 10 CFR 2.790(b) needed to support withholding these responses from public disclosure.

If there are further questions, or if more information is needed, please contact me at (509) 375-8290.

Sincerely,

R. A. Copeland
Manager, Reload Licensing
