DOCKETING & SERVICE
BRANCH

DOCKET NUMBER PR 34
PROPOSED RULE
(54FR 47089)

January 18, 1990

Secretary
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Attention: Docketing and Service Branch

Gentlemen:

After reading the new proposed legislation of ASNT's involvement in central certification, we as owners and managers see no useful purpose for this, other than to line the pockets of the ASNT. We agree that training, testing and certification if conducted on a local level can prove to be successful and beneficial to the industry.

We have completed our training, testing and certification through the Bureau of Radiation Control in Austin. Any additional requirements to this issue would serve no purpose and prove to be unfair, unjust and devastating to the industry.

We, as management, intend to do whatever is necessary to prevent duplication of regulations.

We anticipate a response to this letter, and appreciate your cooperation in this matter.

Respectfully,

MD. Meadows
Mark D. Meadows
Radiation Safety Officer
