Dear Dr. Murley:

Commonwealth Edison originally submitted a proposed Technical Specification Amendment in Reference (a) regarding the operation of the Containment Purge & Vent System. Reference (b) provided a revised Amendment request that superceded Reference (a). Reference (c) provided clarification to the revised Amendment Request. At this time Commonwealth Edison requests that the proposed Amendments referenced above regarding the operation of the Containment Purge and Vent System be withdrawn.

In the near future Commonwealth Edison plans to propose an Amendment request on this topic that will include a request to revise the Zion Station Confirmatory Order.

Please direct any further questions on this matter to this office.

Very truly yours,

R.A. Chrzanowski
Nuclear Licensing Administrator
