Docket No. 50-395

Mr. O. S. Bradham
Vice President, Nuclear Operations
South Carolina Electric & Gas Company
P. O. Box 88
Jenkinsville, South Carolina 29065

Dear Mr. Bradham:

SUBJECT: V. C. SUMMER NUCLEAR STATION, UNIT NO. 1 - SAFETY EVALUATION,
NUREG-0737, ITEM II.D.1, PERFORMANCE TESTING OF RELIEF AND
SAFETY VALVES (MPA F-14) (TAC NO. 51606)

By letter dated April 5, 1982, as supplemented July 30, 1982, September 8,
1982, May 5, 1988 and May 31, 1989, you provided responses to TMI Action
Plan Requirements, NUREG-0737, Item II.D.1, Performance Testing of Relief
and Safety Valves.

The enclosed Technical Evaluation Report (TER) states that you have met all
of the II.D.1 requirements with the exception of the open items indicated in
Section 5.2 of the TER. The staff agrees with the findings in the TER and
has determined that you should complete these open items to fully meet II.D.1
requirements. For closure of any of the TER open items, you should proceed
without the need for further NRC review. Changes to the facility, however,
remain subject to a 10 CFR 50.59 review.

On the basis of the above, we have complete the NRC action under TAC No. 51606
for TMI Action Item II.D.1. Your implementation date for this Item should be
provided to me.

The reporting and/or recordkeeping requirements contained in this letter
affect fewer than 10 respondents; therefore, OMB clearance is not required
under P. L. 96-511.

Sincerely,
Originally Signed By:
John J. Hayes, Jr., Project Manager
Project Directorate II-1
Division of Reactor Projects -I/II
Office of Nuclear Reactor Regulation

Enclosure:
As stated
