 Re: Application for License to Export Enriched UF6  
 for the Tomari Plant Unit No. 1, Region 6.

Dear Ms. Wright,

Please find enclosed our application for licence to export slightly enriched UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Tomari Plant Unit No.1 (Region 6) owned by the The Hokkaido Electric Power Company Inc.

The country of origin of the Uranium is France.

The contract number for the uranium enriching services with the U.S. Department of Energy is DE-SC05-84UEJA201.

The relevant enriched UF6 will be delivered at the U.S. D.O.E. Portsmouth Enrichment Plant in Piketon, Ohio. After being exported to Japan, it will be converted to UO2 powder, pelletized and fabricated into fuel assemblies by Mitsubishi Nuclear Fuel, Ltd. or Nuclear Fuel Industries, Ltd.

As to the validity of the export license, we wish to have a two year period from the date of issuance.

With regard to sampling, we request that two (2) P-10 tube samples be taken from each parent cylinder. This sample should be delivered to us c/o Teledyne Isotopes for independent analysis. We also request that the Nuclear Audit & Testing Company witness the weighing and sampling.

Thank you for your attention to the above and should you have any questions, please call us at (212) 605-2150.
