

JAN 31 1990

Mr. John M. Rooney, Director  
Technology Policy Division  
Office of Classification and  
Technology Policy  
U. S. Department of Energy  
Washington, DC 20585

Dear Mr. Rooney:

This is in reference to a letter to you dated January 19, 1990, from  
C. N. (Mike) Smith of this office regarding export license XSNM02501.  
Attached is a revised application for this license for the export of low-  
enriched uranium for use as fuel in the DR-3 reactor in Roskilde, Denmark.

Please note that the Metallurgi Department of the Riso National Laboratory is  
named as "intermediate consignee" for "Fabrication of the uranium into fuel  
elements," and that this Department has a separate Reporting Identification  
Symbol (RIS code) from that of the reactor. The RIS code for the reactor is  
RENL. The RIS code for the fabrication facility is RENP. Please consider  
this additional information in considering the application and seeking Letters  
of Assurance from EURATOM.

Sincerely,

*Betty S. Wright / for*

Marvin R. Peterson, Assistant Director  
for International Security, Exports,  
and Material Safety  
Office of Governmental and Public Affairs

Attachment:  
Revised appl. dtd. 1/17/90  
(XSNM02501)
