

February 1, 1990

Docket Nos. 50-282, 50-306, 50-315, 50-316

MEMORANDUM FOR: John Stolz, Project Director  
Project Directorate I-4  
Division of Reactor Projects

FROM: John G. Thoma, Acting Director  
Project Directorate III-1  
Division of Reactor Projects - III,  
IV, V & Special Projects  
Office of Nuclear Reactor Regulation

SUBJECT: CLOSEOUT OF MPA G-01 (REACTOR COOLANT PUMP TRIP) - Verification

By memorandum dated December 19, 1989, you requested verification that three of my plants (Palisades, D.C. Cook, and Prairie Island) had completed MPA G-01. By separate memorandum you received a copy of the verification letter for Palisades. On January 29, 1990 the D.C. Cook Project Manager, Joe Gitter, informed me that he had verified via contact with licensee personnel and observation during site visits that all commitments listed in our July 31, 1988 safety evaluation on MPA G-01 has been implemented. On January 30, 1990, the Prairie Island Project Manager, Dominic DiIanni, informed me that he had contacted his licensee and verbally verified that all commitments listed in our safety evaluation of October 8, 1986 have been implemented for some time. In accordance with your December 19, 1989 memorandum, this memorandum serves to document verification of implementation of MPG G-01 at D.C. Cook 1 & 2 and Prairie Island 1 & 2.

Original signed by

John O. Thoma, Acting Director  
Project Directorate III-1  
Division of Reactor Projects - III,
