RE: L-Bar Closure, Docket 40-8904, License SUA-1472

Dear Ms. Jacoby:

As requested, please find the following:

1. Gradation criteria used for rip rap, rock cover and filter plus a rock evaluation by AK Geoconsult, Inc.
2. Replacement sheets for illegible compaction summary sheets previously forwarded.
3. Replacement sheets for recompaction test summary sheets with added notes.
4. Daily load count sheets for materials moved during closure.

We also enclose a plan of the L-Bar piezometer and settlement gauge locations to accompany the AK Geoconsult, Inc. report on settlement forwarded directly to your office to the attention of R. Hall for the January 15th reporting requirement.

We trust this is the information you need to complete your evaluation.

Sincerely,

William T. Hamilton Jr.

Thomas G. Osborn
