RECEIVED

Gentlemen:

This is a request for renewal of USNRC License No. 20-15610-01 which expires on September 30, 1988. At this time there are no changes in either the use of or the personnel responsible for the facility. As stated in the license, the only radioactive material within the activation analysis facility is Hydrogen 3 incorporated in foil form in a sealed generator tube rated at 20 Curies as described in the original license dated April 14, 1978. I have reviewed the current license and supporting documents and have found them to be in order. The only addition to the facility is a replacement of a damaged survey meter with a Ludlum Model 3 meter (Ludlum Measurements, Inc., Sweetwater, TX).

Enclosed is a check for \$170.00 for the renewal fee. If there are any questions, you may contact Francis X. Pink or James Kaye.

Sincerely,

FRANCIS X PINK
Senior Member of Technical Staff
Materials Analysis Department

JAMES KAYE
