Revised

April 4, 1989

Mr. John Potter
United States Nuclear
Regulatory Commission
Region II
101 Marietta Street, N. W.
Atlanta, GA 30323

Dear Mr. Potter:

Atlanta Wire has ordered one (1) more NDC Systems Model 104 portable gamma gage for use on paper machines, making a total of five (5) gages.

Accordingly, please amend our license to reflect that the material source amount should now be 400 millicuries, no single source to exceed 80 millicuries.

In order to minimize frequent transport of the gages, we will now be using a secondary storage location for this new gage as follows:

1. Mr. Roy Engstrom
Technical Service Representative
Route 1, Box 221
Old Town, ME 04468

Roy is listed on our license and will primarily store the gage in his company car, which under company policy is restricted for business use by him. In addition, a locked outside storage area is available if needed.

Please advise if you have any questions regarding the above.

Sincerely,

ATLANTA WIRE WORKS, INC.
