DOCKETED  
USNRC

90 FEB -8 A10:05

Docketing + Service Branch  
US Nuclear Regulatory Commission  
Washington, D.C. 20555

OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

To Whom it may Concern:

The increase of nuclear waste being refined will cause a great increase in international transportation of these wastes. The standards for overflights of the US by aircraft of any nation should not be weakened by any means. The international regulations for container survival at 25 mph. is ludicrous. The 25 mph. impact criteria for waste container survival is surely a disaster destined to happen.

We strongly support Senator Murkowski's language on this issue. Any relaxation of this pending legislation's standards only shows one more time the

incompetent way the NRC responds  
to the safety of this nation

if the NRC should happen to have  
any national reasons for their strong  
stand against that which Senator  
Munkowski advocates, we would  
appreciate to know the justification.

Sincerely,

Roberta Highland
