To Whom it may concern;

OFFICE OF SECRETARY  
DOCKETING & SERVICE

This letter is in response to policy concerning air shipment of plutonium over Alaska. As a resident of this state, I would like to strongly encourage you to accept and hold fast to the Murkowski transportation standards.

I feel that they are minimally adequate and it would be hazardous to settle for the much weaker International Atomic Energy Agency standards. As you are aware of the differences, and are hopefully receiving many letters stating the public's varied view, I'll not go into the details, but will trust in your abilities to think farsightedly.

Thanks For Your Consideration,  
Charlie Gibson
