Gentlemen:

SUBJECT: NORTH ANNA POWER STATION UNITS 1 AND 2 CONTROL ROOM HABITABILITY SYSTEM, INSTRUMENT AIR SYSTEM, "MIDAS" SOFTWARE AND HARDWARE, AND IN-SERVICE TESTING FLOW INSTRUMENTATION REVISED COMMITMENTS REGARDING DESIGN MODIFICATIONS

We have reviewed your letter, subject same as above, dated December 21, 1989. Based on our technical review, we concur in the revised implementation schedule for all the discussed issues. We are concerned, though, over the timeliness of informing this office that significant commitments made to the NRC would not be completed as scheduled. Conversations between our respective staffs prior and subsequent to the receipt of your letter indicate the problem to be primarily in your corporate and site management of commitments.

We understand that, based on your concern over this matter, you have requested to discuss your commitment management system with us. This letter confirms the telephone conversation between Mr. R. F. Saunders of your staff and Mr. P. E. Fredrickson of my staff on January 18, 1990, scheduling a management meeting on this issue to be held at the Region II Office on February 21, 1990, at 10:30 a.m.

Should you have any questions regarding these arrangements, we will be pleased to discuss them.

Sincerely,

Original signed by
