Re: License: General License (10 CFR 150.20)
Docket: 15000043/89-01

Gentlemen:

In reference to your letter of January 2, 1990, regarding an on site inspection of our operations on December 8, 1989, we have corrected the violations listed on your form 591.

Violation H has been corrected by welding braces to the truck frame and bolting the radioactive material container to the welded frame. Also, we video taped the radioactive material box being dropped from a height of 30 feet. The locked box did not break open when it hit the ground. We will be glad to furnish you a copy of this vodo if you desire.

Violation I. We conducted a class for our employees to make certain they know what is required and how important shipping papers are to our operation. We also addressed the problem connected with the utilization logs not being properly maintained in the class.

I appreciate the efforts of your commission in helping us conduct our business in a safer atmosphere.

Sincerely,

William H. Robinson
