Gentlemen:

This refers to the inspection conducted by Mr. R. B. Vickrey of this office and Dr. M. C. McCoy-Thompson of the Office of Nuclear Reactor Regulation (NRR) during the period January 8-11, 1990, of activities authorized by NRC Operating License NPF-42 for Wolf Creek Generating Station (WCGS), and to the discussion of our findings with Mr. J. A. Bailey and other members of your staff at the conclusion of the inspection.

The principle area examined during the inspection was training and qualification effectiveness at the (WCGS) site. Within this area, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to a previously identified inspection finding. The status of this item is identified in paragraph 3 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:
Samuel J. Collins
