 2. E. J. Mroczka letter to U.S. Nuclear Regulatory Commission, "Millstone Nuclear Power Station, Unit Nos. 1, 2, and 3, Response to Combined Inspection Nos. 50-245/89-80; 50-336/89-80 and 50-423/89-80," dated November 8, 1989.

Gentlemen:

Millstone Nuclear Power Station, Unit Nos. 1, 2, and 3
Implementation Schedule--Dedication of Commercial-Grade Items

In a letter dated September 1, 1989 (Reference 1), the NRC Staff transmitted to Northeast Nuclear Energy Company (NNECO) the report of the NRC Special Maintenance Team Inspection conducted from April 30 to June 16 and July 10-14, 1989, at Millstone Nuclear Power Station, Unit Nos. 1, 2, and 3. Within this report, the NRC Staff requested NNECO to provide the program plan outline and implementation schedule to assure dedication of commercial-grade items (CGIs) including parts and materials currently in stock and for any additional procurement of CGIs prior to use in safety-related systems and components. This information was provided in a letter dated November 8, 1989 (Reference 2). The purpose of this letter is to provide the NRC Staff with an update to the schedule previously provided.

In our November 8, 1989, letter to the NRC Staff, NNECO informed the Staff that a Material Control Group/Procurement Engineering Section (MCG/PES) had been established to review all QA purchase requisitions and commercial-grade part dedications. This group is currently staffed with a representative from each unit's Engineering Department, and additional manpower will be provided through use of outside contractors. Previously, NNECO had expected to provide this additional manpower by January 1, 1990. However, because of station staff reorganizations occurring at Millstone, this additional manpower will

not be in place until March 1, 1990. Full program implementation, as described in our November 8, 1989, letter, will commence when staffing levels are augmented.

We trust you will find this information satisfactory, and we remain available to answer any questions you may have.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

E. J. Mroczka
Senior Vice President
