Operating Reactors Branch No. 4

Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334
License No. DPR-66
Request for Amendment to Appendix A Technical Specification
Portion of Operating License

Dear Mr. Reid:

The letter of October 28, 1976 which requested a Technical Specification change for Beaver Valley No. 1 Unit contained a typographical error in the third paragraph.

The last sentence of the third paragraph should read as follows:

Mr. Stolz's letter stated that the design of the Auxiliary River Water System has already been documented and a safety analysis need not accompany this request.

Three (3) signed originals and sixty (60) copies of this letter are included. Please add this letter to the original request.

Very truly yours,

C. N. Dunn
